

MetShield™ Advanced Delta Technology

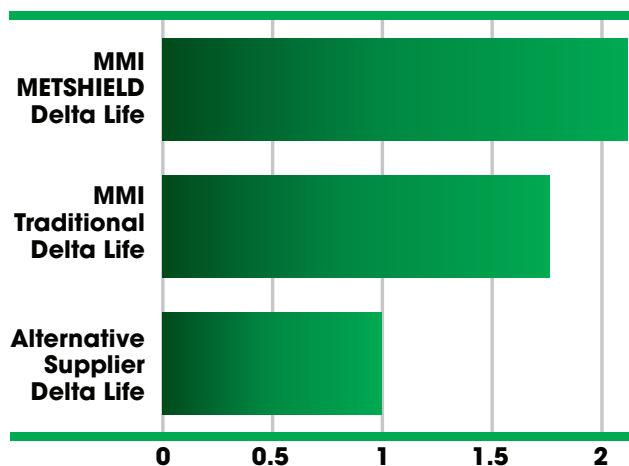

MAGNECO/METREL

INCREASED HEAT AND WEAR RESISTANCE, UP TO 100% LONGER LIFECYCLE.

Metshield™, our latest technology delta, stands up to all the high heat and wear your EAF can throw at it.

Metshield™ is engineered to provide up to 100% longer life than alternative suppliers, and 40% longer than Magneco's prior generation of delta compounds.

MMI New METSHIELD™ Delta Performance

MetShield™ offers superior performance in high heat/high draft furnaces, with exceptional resistance to concentrated hot spots and post combustion wear.

THE HIGHEST PERFORMANCE.

MetShield™ is setting records for delta life, delivering exceptional thermal/abrasion resistance, high hot/compressive strengths and chemical/alkali resistance. To engineer the industry's best delta performance, we considered these factors:

- Drafting
- Thermal Heat Cycling
- Abrasion
- Burner Deflection
- Post Combustion
- Arc Strikes
- HBI/DRI
- Lime injection
- Burner Efficiency

SCHEDULE A TRIAL, SEE THE PROOF.

Let us show you the unrivaled performance of Metshield™. We will track and compare the performance/life of your current delta versus Met Shield™ and prove you will reduce your refractory cost per ton. MetShield™ deltas deliver the highest value.
