

MetPump® Ladle Well Blocks

MAGNECO/METREL

98% FREE OPEN RATES

Metpump® well blocks deliver market leading productivity and safety to your ladle tapping and purging operations. With a 98% open rate performance, you will run longer, with predictable flow rates, reduced repairs and increased safety.

INCREASED LADLE AVAILABILITY

Metpump® precast well blocks keep your ladles in rotation longer. With superior thermal stability, impact, erosion and chemical resistance, our well blocks last longer and perform better.

CUSTOMIZED TO YOUR NEEDS

Metpump® well blocks can be customized to meet your specific designs and operating conditions to optimize performance.

METPUMP® WELL BLOCKS & LADLE LININGS: A PERFECT MATCH

Metpump® monolithic shotcrete, cast and precast ladle bottoms and safety sleeve products eliminate seams, increasing safety, durability and reducing lost production time. Metpump® colloidal silica refractories work together to keep your ladles flowing and performing until their next scheduled reline. Then we'll get them back into rotation 40-50% sooner, with industry leading dryout and install times.

SCHEDULE A TRIAL, SEE THE PROOF.

Let us show you the unrivaled performance of Metpump® refractory products for your ladle program. We will track and compare performance/life and prove you will reduce your refractory cost per ton. Metpump® delivers the highest value.
